Audience: Neurochemists and all those with an interest in the nervous system.

AIMS AND SCOPE

Neurochemistry International publishes papers primarily concerned with the metabolism and function of the nervous system. This also incorporates the chemical aspects of the anatomy, pathology, physiology, pharmacology and genetics of the nervous system, as well as the biochemistry of the nervous tissues. Other papers demonstrate the relationship of fundamental neurochemical observations to basic neurology, neuropharmacology, chemical pathology and neurotransmission of the nervous system.

IBRO NEUROSCIENCE CALENDAR

The International Brain Research Organization publishes a calendar of events in the neurosciences. It is hoped that the calendar, which is published in *IBRO News*, will help scientists in the field to plan ahead for the meetings they wish to attend. The aim of the calendar is to contain as many announcements as possible of forthcoming scientific meetings in the neurosciences throughout the whole world. It is in a form suitable for mounting on a wall.

IBRO invites organizers of meetings to send information on their meetings, together with a statement as to whether the date is definite or provisional, to: Office of *IBRO News*, University Laboratory of Physiology, Parks Road, Oxford OX1 3PT, U.K.
